

Businesses Reducing Impact on the Environment (BRITE) Program Frequently Asked Questions

Pre-Assessment Questions

What is the BRITE Program?

- Businesses Reducing Impact on the Environment, or “BRITE,” is a grant program created by the Cook County Department of Environment and Sustainability (DES) to assist small businesses that were impacted by the Covid-19 pandemic. With funding from the American Rescue Plan Act, DES helps qualified businesses reduce their environmental impact while creating a healthier environment for their employees, customers and community.

Does my business need to undergo an assessment prior to receiving a BRITE grant award?

- Yes. DES and its partners will conduct an on-site assessment to identify opportunities to reduce pollution and other environmental impacts, including toxic chemical use reduction, renewable energy use, energy and water efficiency and waste reduction practices. The department will conduct a follow-up meeting to discuss these options with the business owner.

How much does the assessment cost?

- The assessment is completely free to participants.

Who will conduct my assessment?

- A representative from DES will coordinate the assessment and may bring in additional expertise to assess certain business categories. In these cases, DES will use a specialized environmental consultant to assist with the assessment. Free energy assessments from your local utility may also be conducted.

How do I prove that my business experienced a negative economic impact due to the COVID-19 pandemic?

- Examples of negative economic impacts include decreased revenue or gross receipts, financial insecurity, increased costs and inability to afford materials, lost capacity to manage financial hardship, challenges covering payroll, rent or mortgage and other operating costs. This information will be requested after the assessment during the grant application process.

How do I sign up for an assessment?

- Complete the [online interest survey](#). You will then be contacted to schedule an assessment.

Does my site need to be in compliance?

- Yes. In accordance with Section 30-186 of the Cook County Municipal Code, a site may not participate if it has any current or unresolved environmental violations or financial or other obligations to the County.

Businesses Reducing Impact on the Environment (BRITE) Program Frequently Asked Questions

Post-Assessment Questions

What happens after an assessment?

- DES and its partners will prepare an assessment report that lists all project recommendations. Businesses will receive the report within 30-60 days post-assessment and DES will then schedule a meeting with the business to discuss project recommendations and next steps. Businesses will be notified if their assessment reports will be received later than the typical 30–60-day timeframe.
- Following the assessment report delivery, businesses that wish to apply for grant funding for their projects may do so by filling out the [BRITE Grant Application](#).
- Businesses selected for a grant will receive a grant offer letter, listing specific project options that have been approved for funding. To accept the award, businesses then select the projects for which they would like to apply the grant funding and return the project selection page. This may require a prioritization of projects if the expected costs will go over the \$300,000 cap.
- All BRITE grant awardees must attend one BRITE grant orientation training hosted by the Chicago Urban League (CUL) and two sustainability trainings cohosted by CUL and DES.

What are some examples of projects, specific products and equipment upgrades the BRITE Grant may cover?

- Replacement of dry-cleaning equipment that uses perchloroethylene with a newer model that uses a safer alternative cleaning agent such as those in wet cleaning machines
- More efficient spray booths
- Safer solvents used in the metal finisher process
- Purchase and installation of process equipment to conserve energy and water
- Purchase of cleaning products that are EPA Safer Choice verified

Do I have to implement project recommendations on the assessment report?

- No, the business owner decides whether to implement the projects identified by the assessment and whether to proceed with the grant application.

What are eligible uses of the BRITE Grant funds?

- Once the Beneficiary Agreement is signed, grant dollars awarded from the BRITE Grant must be used to improve business operations and practices to reduce environmental impacts as recommended on the assessment report. The applicant will be given an opportunity to choose from the projects recommended on assessment reports up to the funding cap of \$300,000 per business.
- Typically, the BRITE Grant will cover 100% of the top pollution prevention project identified by the specialist in the report and up to 50% for all other projects until the \$300,000 cap is met.

Does the County offer any additional support to small businesses?

Businesses Reducing Impact on the Environment (BRITE) Program Frequently Asked Questions

- Cook County offers the following additional services to support small businesses:
 - [Cook County Small Business Source](#) directly connects small business owners with expert guidance and support to take businesses to the next level.
 - [Cook County's C-PACE Program](#) helps property owners secure low-cost, long-term financing for energy efficient upgrades.

How will the grants be disbursed to businesses?

- Grantees will work with DES' subrecipient, the Chicago Urban League (CUL), on selecting vendors for projects. Once vendors have been selected, grant funds will be used to pay vendor invoices up to the amount of the grant award, as detailed in the grant beneficiary agreement. Grantees will be responsible to pay for any remaining balances not covered by grants.
- Reimbursement for goods and services will be considered on a case-by-case basis. For example, grantees may be reimbursed for replacing older equipment essential to operations that malfunctioned prior to receiving grant funds, if the equipment was identified in the grantee's BRITE assessment report and was part of grantee's BRITE Grant application. To apply for reimbursement, grantees must hold onto their receipts and send a request to BRITE@cookcountyil.gov to begin the process.

When do I need to spend all of the Grant money by?

- You may use the funds through 2026 on approved projects as detailed in the beneficiary agreement.
- **Funds do not need to be spent all at once. However, funds must be spent before the end of 2026.**

How much money can I receive?

- The maximum award is \$300,000 per applicant for approved projects and equipment.
- DES will fund the pollution reducing project with the most environmental impact as determined by the BRITE assessment report (**up to a maximum cap of \$300,000**).
- For all subsequent recommendations, DES will fund up to 50% of purchase value with the applicant covering the remainder of costs (**up to a maximum cap of \$300,000**).

What is a beneficiary agreement?

- A beneficiary agreement is an agreement between a business and DES outlining the terms for use of the grant funding.
- The business owner and staff from DES's subrecipient, Chicago Urban League, will sit down and go through the beneficiary agreement. The business owner can ask any questions about the agreement at that time.
